It is pointed out that the F. M. B. A. is this evil. They ask it as American citizens confined to the democratic counties in this and they will not be content with an evastate. Do the farmers really wish to have their interests looked after by a man of Tanner's strips? If they do not they had better keep a close and suspicious eye on the future movements of Tanner's midnight visitor. Lindley ought to resign from the F. M. B. There is no redress or remedy for this wrong. This authority, of the directors, is absolute and irreversible. Every parochial school in Illinois is in jeopardy, and liable to the arbitrary non-approval of school directors. The law should be so amended, that it shall be the duty of school directors to exempt the scholars of parochial schools, in which all the prescribed branches of knowledge are taught according to law, from its amenability as truants while they are attending such schools. The law is also branches be taught in the English language. What harm can result in teaching them in i both the English and German languages, so long as the English is taught in the particular branches of study required by law, Then the law demands that the children must attend either the public or an upproved private school in the district within which they reside. Why must the parochial school be in the public school district, if the child and its parents prefer to go to the parochial school, although it may be outside of the district in which the child resides?

The republican party say they are in favor of public free schools and compulsory education. The democrats emphatically claim themselves to be the authors of the public free schools and that they are in favor of compulsory education. To both of these positions the opponents to certain parts of that law say, we agree; but they go further, and want a positive answer from one or both parties whether they will amend the law in respect to that part dence that the person it once belonged to was which goes further and infringes upon the over seven feet tail. Decatur during years would be small in comparisor. Buying in great quanties at first hands and saving every possible discount, wis, to join Holland & Bowman's encus this house is able to own its goods at a figure which no retailer ever thinks possible. The retail establishment in Decatur, Ferriss & Lapham shoe store, is supplied direct by the Chicago wholesale house, consequently it always has its goods at a figure which would enable it to sell to all other daughter is very iill dealers here at a profit The real truth is that the regulation retail selling price is about the figure which other dealers here pay for their goods We can give good substantial into business at that place shoes at a price which other Decatur dealers will charge you for shoddy stuff Our goods are all new and fresh and are coming in all the time. No old shop worn goods. We are determined to make this retail business larger than in any previous year. It is the volume of trade, not the size of the profit that we are after Come yourself and tell your neighbors to come to us for everything in the shoe line. We will save you big money.
